Climate Change Levy (CCL)

Government energy tax on industrial and commercial consumption, subject to VAT at Standard Rate. This is a CCL accounting document.

Fossil Fuel Levy (FFL)

Government tax on industrial and commercial electricity sales revenue (to fund renewable energy schemes). To calculate FFL multiply the sum of Total Consumption and Total Other Charges amounts by 0.3% for England and Wales or 0.8% for Scotland. Please note that from 1/4/02 the FFL rate for England & Wales will be reduced to zero. FFL is not subject to VAT.

Kilowatt Hours (kWh)

This is the unit of measure for energy consumed, sometimes referred to as the units of measure for electricity supplied.

Supply Number (MPAN)

The electricity supply number is also referred to as the Meter Point Administration Number (MPAN) and is printed on each bill you receive.

HOW TO CALCULATE NON HALF-HOURLY CHARGES

- To calculate the number of Billed Units (electricity consumed) deduct the present meter read from the previous and multiply this figure by the multiplier (Multi).
- Non half-hourly meters may have up to six registers. The time periods these refer to are stated on your invoice. Where more than one register has been used to generate a charge this will be shown. In such cases the Billed Units of each register for a particular time period should be summed together to give the 'total' Billed Units.
- Multiply the Billed Units by their respective Price to calculate the Cost.
- The total (Consumption) is the consumption for all the registers for the period of use. The total cost associated with the total consumption is stated.
- Multiply the Billed Units of the Standing Charge by the Price (if applicable).
- Multiply the Billed Units of the Capacity Charge by the Price (if applicable).
- Add together the Standing Charge and Capacity Charge to get the Total Other Charges.
- Apply CCL at the rate specified on your invoice unless any reductions apply.
- VAT is applied at Standard Rate unless any exemptions apply.
- The sum of these calculations amounts to the Total Electricity Sales.
